What To Do About Your Brain-Injured Child[®]

What Parents Say About The Course

“The course was even better than I expected. This was one of the best weeks of my life because I’m now equipped with the knowledge to make my son well.” Jodi Kukla, USA

“Instead of the usual frustrations, refusals, disappointments, fights and tears that we meet in the world of brain-injured kids, this course is a supernova of hope and opportunities.”
Martin Holst, Denmark

“I learned that my son has a good chance at a rich, fulfilling life. I learned incredible information on how I can grow my child’s brain!”
Jim Campbell, Canada

“By developing a well-thought-out plan of attack, using The Institutes theories, we will deliver results. I know this to be true because we already see positive results.” Michael Clause, USA

MORE THAN A HALF-CENTURY OF EXPERIENCE

Parents come from all over the world to The Institutes for the Achievement of Human Potential to learn how to significantly increase their child’s mobility, intelligence, and social growth, and to improve their health and physical growth. *What To Do About Your Brain-Injured Child* is a comprehensive course that provides parents with vital information to place their child on the pathway to wellness.

PARENTS ARE THE BEST THERAPISTS

The Institutes strongly believes that children do best at home with their mothers and fathers. When parents know how to provide an ideal environment for brain growth, they are the best teachers for their child. When the family learns how to work as a team, parents can achieve significant results. The family is the answer—not the problem.

IS YOUR CHILD A CANDIDATE?

Children may have been diagnosed with cerebral palsy, autism, Down syndrome, developmental delay, attention deficit disorder, hyperactivity, or learning problems.

The Institutes treats the full spectrum of brain-injured children. Children range from those who are blind, deaf, paralyzed, insensate, and speechless to children who may have learning problems in school—and every kind of brain-injured child in between.

No child is ever turned down because of the severity of the brain injury. The Institutes provides help for all brain-injured children.

TO ENROLL, CONTACT THE INSTITUTES at (215) 233-2050 or (800) 736-4663, or email us at wtd_registrar@iahp.org.

What You Will Learn...

About the Brain

■ Learn what brain injury is, what causes it, and the range of brain injury. Understand how the brain grows and how it can be stimulated to grow faster.

About Evaluation

■ Learn how to evaluate your child in the six critical areas of human function, resulting in a clear, functional developmental profile.

About Mobility

■ Mobility is essential to all aspects of brain growth. Parents learn how to create the ideal mobility program for their child.

About Physiology

■ Understand why brain-injured children have chronic illness and problems with eating, sleeping, breathing, allergies, seizures, or behavior. How to solve these problems is a vital part of the course.

About Intelligence

■ Brain-injured children have enormous intellectual potential. Parents learn how to teach effectively and how to learn side-by-side with their child.

A Unique Experience For Parents

TEACHERS WHO REALLY CARE

The Institutes staff provides expert instruction to insure that parents understand the fundamentals of brain growth and development. They also offer practical know-how gained from years of first-hand experience with a wide range of brain-injured children. The staff is available throughout the course to answer questions and get to know each parent.

ARE YOU PREPARED?

No parent ever expects to have a hurt child. Parents often feel lost and alone with a serious problem to solve. The course gives parents the opportunity to attend a school designed just for them. By the end of the course, parents have new answers to old questions and real solutions to help their child when they return home.

IS IT WORTH IT?

The Institutes is aware of the sacrifices that parents make to attend the course, often traveling thousands of miles to do so. Overwhelmingly parents say that it is worth the time, the effort, and the resources. Parents often comment that the course teaches them how to bring their whole family together as a team to help their hurt child. Couples who attend say they are closer and more appreciative of each other as a result. After completing the course, parents can receive on-going support and information by attending The Institutes Lecture Series or by joining The Intensive Treatment Program.

About The Institutes

THE INSTITUTES FOR THE ACHIEVEMENT OF HUMAN POTENTIAL

is a group of nonprofit institutes founded by Glenn Doman in 1955. The Institutes is internationally known for its pioneering work in child brain development and for its programs to help brain-injured children achieve wellness.

HISTORICALLY, BRAIN-INJURED CHILDREN have been considered hopeless. Thousands of parents have come to The Institutes to learn how to treat their children at home. Those parents have proven beyond any doubt that brain-injured children are not hopeless, but instead have tremendous potential. The Institutes exists to insure that all brain-injured children have a fighting chance to be well.
